## Planned Expansion or Reduction in F.Y. 1954:

None

## Functions Performed:

The major function of this installation is to maintain and operate a punch card index of a large volume of intelligence data; and upon request, to search for and recall references to such material for use in solving intelligence problems.

The requests made upon the index are varied with the result that each request requires special consideration and handling. There are no lengthy routine machine runs.

This installation is located in a restricted area and for security reasons cannot be included in the OCD Machine Pool (Account B).
